## About Me

Results-driven Full-Stack Developer with over 6 years of experience specializing in Laravel backend development, RESTful and GraphQL APIs, and modern frontend frameworks including Vue.js and React.js. Proven ability to architect scalable, maintainable solutions, optimize database performance (MySQL, MongoDB), and lead cross-functional teams in delivering high-impact web and mobile applications. Skilled in seamless third-party integrations (Stripe, AWS, Google Maps) and passionate about writing clean, efficient code that drives system performance and business innovation. Seeking a challenging opportunity to apply my technical expertise and leadership to build transformative digital products.

## Technical Skills

- **Backend Development:** Laravel (Framework & Ecosystem), PHP (OOP & MVC), FilamentPHP, Backpack for Laravel, Livewire, RESTful Services, API Token Authentication (JWT), Queue Jobs, WebSockets, Laravel Reverb, Artisan Console, Eloquent ORM
- **Frontend Development:** Vue.js, React.js, Next.js, Nuxt.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS, Tailwind CSS, Bootstrap, Material UI/UX Practices, Vuetify, Redux, Vuex, React Router, Vue Router, SPA (Single Page Applications), SSR (Server-Side Rendering)
- **API Development & Integrations:** RESTful APIs, GraphQL, OAuth 2.0, JWT, Microsoft SSO, Google Maps API, Mapbox API, Instagram API, Stripe API, Shopify API, DHL Express API, FedEx API, Pusher, Firebase Authentication, ZegoCloud API, Restful API design.
- **Database Management:** MySQL, MariaDB, MongoDB, SQLite, Database Design, Query Optimization, Eloquent Relationships, Migrations, Seeders

- **DevOps & Cloud Infrastructure:** AWS (EC2, S3), DigitalOcean, Docker, Kubernetes, cPanel, Cloud Deployment, CI/CD Pipelines, Jenkins, NGINX, Apache, SSL Configuration
- **Version Control & Collaboration:** Git, GitHub, GitLab, Bitbucket, Git Workflow, Branching Strategies, Code Reviews
- **Testing & Debugging:** Unit Testing, Test-Driven Development, Feature Testing, PHPUnit, Postman, Swagger, Code Analysis, Browser DevTools, Chrome Extensions for Debugging
- **Project Management & Agile Practices:** Agile Methodology, Scrum, Kanban, Jira, Trello, Notion, ClickUp, Sprint Planning, Task Estimation,, SOLID principles
- **Tools & Environments:** PhpStorm, WebStorm, Visual Studio Code (VS Code), Docker Desktop, Postman, Figma (for UI collaboration), Terminal CLI
- **Programming Languages:** PHP, JavaScript, TypeScript, C++ (Basic), SQL, Shell Script (Basic)
- **Soft Skills:** Problem Solving, Critical Thinking, Debugging, Team Collaboration, Clean Code Practices, Technical Documentation

## EXPERIENCE

### SpringRing, Bahrain - *Senior Fullstack Developer*

January 2022 - PRESENT

- Spearheaded and collaborated with a team of developers and engineers, ensuring effective project execution.
- Managed MongoDB and MySQL Databases, ensuring efficient data handling and retrieval.
- Successfully maintained and improved legacy code, incorporating modern practices for system integrity.
- Elevating and improving the performance of Vue.js and react.js web apps.
- Elevating and improving the performance of Laravel web apps.
- Managed DevOps AWS and Digital Ocean Servers.

### Vii Tech Solutions, Bahrain - *Senior Fullstack Developer*

December 2022 - December 2023

- Spearheaded and collaborated with a team of developers and engineers, ensuring effective project execution.

- Developed Backend APIs for multiple projects using NestJS for streamlined functionality.
- Developed Backend APIs for multiple projects using Laravel Framework.
- Managed MongoDB and MySQL Databases, ensuring efficient data handling and retrieval.
- Implemented diverse integrations, from Stripe to local payment gateways and shipping providers like DHL Express & FedEx.
- Successfully maintained and improved legacy code, incorporating modern practices for system integrity.
- Elevating and improving the performance of Vue.js and react.js web apps.

### **Code Brisk, Pakistan** - *Software Engineer*

July 2018 - October 2022

- Led backend development initiatives with support of Senior Engineers
- Elevating and improving the performance of Vue.js web apps.
- Managed MySQL database implementation across diverse projects.
- Implemented various types of integrations, including Stripe, Shopify, and analytics systems.
- Contributed to planning, analysis and design phases of projects.
- Developed from beginning to end 70+ projects with positive feedback.

### **Sudosol, Pakistan** - *Associate Software Engineer*

October 2017 - July 2018

- Specialized in backend development using Laravel framework.
- Worked on Vue.js to enhance user interfaces and experiences.
- Supported Senior Developers code & logic issues in multiple projects.
- Helped in the evaluating required tech-stack based on client requirements.

## **Languages**

- English

## **EDUCATION**

### **University of Sargodha (UOS), Sargodha** - *MSc (IT)*

Graduated 2017 - 3.46 GPA
